LIFE SCIENCES

LIFE SCIENCES GRADE 12 TERM 1 CONTROLLED ASSESSMENT PACK

SUBJECT	LIFE SCIENCES
GRADE	12
ASSESSMENT TASK	LIFE SCIENCES GRADE 12 TERM 1 CONTROLLED ASSESSMENT PACK
MARKS	50
TIME	1 hour

Educator approval required before classroom use.

INSTRUCTIONS AND INFORMATION

1. Read all instructions carefully.

2. Answer all questions or complete all activities as instructed.

3. Show all working where calculations, planning, diagrams or explanations are required.

4. Use the space provided by the educator, answer booklet or learner task book.

5. Write neatly and clearly.

VISUAL MATERIAL

FIGURE 1: Science Data Table And Graph Stimulus

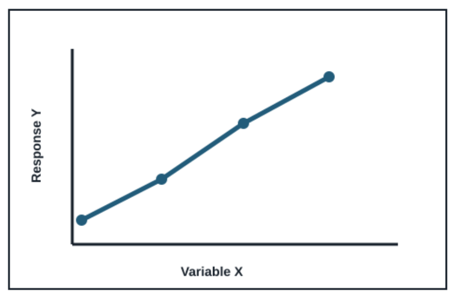
Life Sciences DATA

Life Sciences Grade 12 Term 1 Controlled Assessment Pack

Science data table and graph stimulus

Experimental results

Trial	Variable X	Response Y	Unit
1	0	2.1	units
2	5	5.8	units
3	10	9.4	units
4	15	12.7	units



Interpretation prompts

Describe the trend: ______________________

Calculate the change: ______________________

State a conclusion supported by data: ______________________

FIGURE 2: Investigation Data And Method Sheet

Life Sciences

INVESTIGATION

Life Sciences Grade 12 Term 1 Controlled Assessment Pack

Investigation method, data and conclusion

Aim — Variables — Method — Results — Conclusion

Reading	Observation	Unit	Pattern / anomaly

Conclusion supported by data:

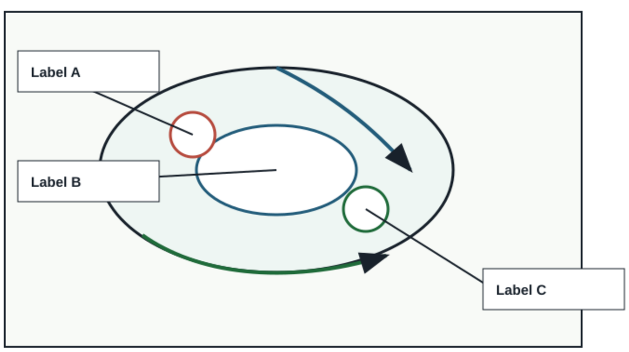
FIGURE 3: Life Sciences Labelled Diagram Stimulus

Life Sciences

DIAGRAM

Life Sciences Grade 12 Term 1 Controlled Assessment Pack

Labelled science diagram stimulus



Use this as the supplied diagram; replace labels with topic-specific structures during review.

Assessment actions

Life Sciences Grade 12 Term 1 Controlled Assessment Pack

- Identify labelled structures
- Explain the process
- Relate structure to function
- Predict effect of a change

QUESTIONS

QUESTION 1: SECTION A: CONCEPTS AND DATA

Instructions: Use the supplied data, diagram or graph.

Stimulus: Data/diagram stimulus linked to DNA, meiosis, genetics and inheritance patterns.

1.1. Define one key concept from the term focus. **(2)**

1.2. Describe the trend or relationship shown by the supplied data. **(5)**

1.3. Explain the process or principle using correct terminology. **(8)**

1.4. Calculate or infer a result from the supplied values and show working where needed. **(5)**

QUESTION 2: SECTION B: INVESTIGATION DESIGN

Instructions: Critique method, variables and evidence.

Stimulus: Investigation focus: interpreting genetic crosses, diagrams and data tables.

2.1. State a suitable aim or hypothesis for the investigation. **(3)**

2.2. Identify independent, dependent and controlled variables. **(6)**

2.3. Evaluate validity and reliability and suggest one improvement. **(6)**

QUESTION 3: SECTION C: APPLICATION

Instructions: Use subject knowledge and supplied evidence.

Stimulus: Application focus: application of inheritance evidence to explain biological variation.

3.1. Answer an integrated explanation question using evidence from the stimulus. **(15)**
