Grade 11 English Language: Repairing a school footpath

English Language · Grade 11 · 50 marks · 120 minutes

Educator marking memo

Suggested answers and marking points. Accept equivalent correct responses appropriate to the grade.

Assessment

Read the stimulus and each question carefully.

> *For months, learners at Riverside School crossed a muddy patch between the gate and the bicycle racks. After heavy rain, the path became slippery. The eco-club checked how learners used the route before planning a repair. The club proposed a narrow gravel path, but first checked that rainwater could still drain into the garden. With permission from the grounds manager, volunteers laid the gravel on a Saturday. They left a planted strip beside the path for insects and small flowers. Two weeks later, the club asked users whether the route was easier to walk. Most replies were positive, although some learners requested a wider entrance. The club recorded the feedback for its next meeting.*

Riverside eco-club route-use survey · 60 learners

How often learners used the route	Number of learners
Every day	42
Sometimes	18
Total surveyed	60

1.1 (8 marks) State the route problem. Give two details showing the conditions learners faced, and explain one reason the repair mattered.

- Identifies the muddy patch as the route problem. (1 mark)
- States that the patch was between the gate and the bicycle racks. (1 mark)
- Uses the detail that learners crossed it for months. (1 mark)
- Uses the detail that it became slippery after heavy rain. (1 mark)
- Explains that a slippery path can create a risk of slipping or falling. (1 mark)
- Explains how the route affected learners moving between the gate and bicycle racks. (1 mark)
- Supports the response with two relevant details from the passage. (1 mark)
- Writes a clear answer that separates evidence from explanation. (1 mark)

1.2 (9 marks) Identify the two environmental choices in the club's plan and explain the purpose of each.

- Identifies drainage into the garden. (1 mark)
- Identifies the planted strip beside the path. (1 mark)
- Explains that drainage prevents blocking water flow. (1 mark)
- Explains that plants provide habitat/space for insects or flowers. (1 mark)
- Connects the choices to the project design. (1 mark)
- Uses text evidence. (1 mark)
- Separates the two environmental choices. (1 mark)
- Uses an appropriate cause-effect link. (1 mark)
- Gives a clear answer. (1 mark)

1.3 (10 marks) Use the survey table to compare daily and occasional route use. Calculate the percentage in each group and write one accurate sentence describing what the figures show.

- Reads 42 learners in the every-day group. (1 mark)
- Reads 18 learners in the sometimes group. (1 mark)
- Uses 60 as the total number surveyed. (1 mark)
- Sets up 42/60 x 100 for daily use. (1 mark)
- Simplifies 42/60 to 7/10 or an equivalent fraction. (1 mark)
- Calculates 70% for daily use. (1 mark)
- Sets up 18/60 x 100 for sometimes use. (1 mark)
- Calculates 30% for sometimes use. (1 mark)

- Correctly compares the two proportions (70% versus 30%, or 42 versus 18 learners). (1 mark)
- Writes a clear sentence that accurately describes the comparison. (1 mark)

1.4 (11 marks) Assess one strength and one limitation of the club's feedback method.

- Identifies the two-week follow-up as a strength. (1 mark)
- Explains that users can comment after trying the path. (1 mark)
- Identifies that the passage says 'most replies' without giving a count. (1 mark)
- Explains that the response total is unknown. (1 mark)
- Notes that only route users may have been asked or another defensible limitation. (1 mark)
- Uses evidence from the text. (1 mark)
- Distinguishes strength from limitation. (1 mark)
- Avoids inventing a survey sample size. (1 mark)
- Makes a supported judgment. (1 mark)
- Uses clear paragraph structure. (1 mark)
- Uses appropriate analytical language. (1 mark)

1.5 (12 marks) Write a short recommendation to the eco-club about its next step, using evidence from the passage.

- Makes one clear next-step recommendation. (1 mark)
- Addresses the requested wider entrance feedback. (1 mark)
- Uses the positive replies as relevant evidence. (1 mark)
- Recognises the follow-up response count is not reported. (1 mark)
- Suggests collecting a count or specific user feedback. (1 mark)
- Keeps drainage in the design. (1 mark)
- Keeps the planted strip in the design or explains any change. (1 mark)
- Names who should be consulted. (1 mark)
- Gives a practical action. (1 mark)
- Explains expected benefit. (1 mark)
- Uses a formal, suitable tone. (1 mark)
- Organises the recommendation coherently. (1 mark)

Marking checks

Confirm section totals equal the stated total. Apply the grade-appropriate memo style in the Grade Profile and moderate open-ended answers before use.
