Grade 3 Mathematics: Number, pattern and measurement

Mathematics · Grade 3 · 20 marks · 45 minutes

Educator marking memo

Suggested answers and marking points. Accept equivalent correct responses appropriate to the grade.

Assessment

Read the stimulus and each question carefully.

> *The class collected 24 bottle tops on Monday and 18 on Tuesday. They put the tops into bags of 6 for a sorting activity. A number pattern on the board begins 5, 10, 15, __, __.*

1.1 (4 marks) How many bottle tops did the class collect altogether? Show your addition.

- Chooses addition. (1 mark)
- Writes 24 + 18. (1 mark)
- Adds the ones correctly to make 12 ones. (1 mark)
- Gives 42 bottle tops. (1 mark)

1.2 (4 marks) Use your total from Question 1.1 to put the bottle tops into bags of 6. Show a calculation or equal-groups drawing. State how many full bags you can make and whether any tops are left.

- Uses the total of 42 tops from Question 1.1, or consistently carries forward the learner's stated total. (1 mark)
- Shows division by 6 or a correct equal-groups/repeated-subtraction method. (1 mark)
- Calculates the quotient and remainder correctly for the total used (7 remainder 0 when using 42). (1 mark)
- States the number of full bags and any tops left, consistently with the calculation. (1 mark)

1.3 (4 marks) Complete the pattern 5, 10, 15, __, __, state its rule and give the number that would be in the eighth position.

- Writes 20 in the fourth position. (1 mark)
- Writes 25 in the fifth position. (1 mark)
- States that 5 is added each time. (1 mark)
- Gives 40 as the eighth term, continuing the rule correctly. (1 mark)

1.4 (4 marks) A ribbon is 35 cm long. Sipho uses 12 cm. How much remains?

- Chooses subtraction. (1 mark)
- Writes 35 - 12. (1 mark)
- Calculates 23. (1 mark)
- Includes centimetres in the answer. (1 mark)

1.5 (4 marks) Name one 2-D shape with four straight sides and one object with that shape.

- Names a square or rectangle. (1 mark)
- States that the chosen shape has four straight sides. (1 mark)
- Gives a plausible object with that 2-D shape. (1 mark)
- Distinguishes the flat 2-D shape from a solid object. (1 mark)

Marking checks

Confirm section totals equal the stated total. Apply the grade-appropriate memo style in the Grade Profile and moderate open-ended answers before use.
