Grade 4 Mathematics: Whole numbers, fractions and perimeter

Mathematics · Grade 4 · 29 marks · 60 minutes

Learner name: _____ Date: _____

Time: 60 minutes Total: 29 marks

Instructions

- Answer all five questions.
- Show calculations where requested.
- Use evidence from the printed stimulus when a question refers to it.

Assessment

Read the stimulus and each question carefully.

> *A school garden has 8 rows with 24 seedlings in each row. The garden is a rectangle 8 m long and 5 m wide. Learners water three quarters of the garden on Monday.*

1.1 Calculate the total number of seedlings. Show a method. **[5]**

1.2 Learners measured the garden's four sides with a tape: 8 m, 5 m, 8 m and 5 m. Add the four measurements to find the perimeter. **[5]**

1.3 What fraction of the 192 seedlings is 48? Simplify it. Show how you simplify the fraction and check your answer. **[6]**

1.4 The class has 360 seeds and plants 145. Show the column subtraction, make any regrouping clear, and check your answer with addition. How many seeds remain? **[7]**

1.5 Each seedling needs 250 mL of water. For 8 seedlings, show the multiplication and the conversion calculation. Give the total in millilitres and litres. **[6]**
