Grade 7 Economic and Management Sciences: Needs, wants and a small business budget

Economic and Management Sciences · Grade 7 · 40 marks · 90 minutes

Learner name: _____ Date: _____

Time: 90 minutes Total: 40 marks

Instructions

- Answer all five questions.
- Show calculations where requested.
- Use evidence from the printed stimulus when a question refers to it.

Assessment

Read the stimulus and each question carefully.

> *Lebo sells fruit cups at a school market. She buys 30 cups at R4 each and fruit for R90. She sells 24 cups at R12 each. Six cups remain unsold. Her table fee is R30. All amounts are in rand.*

1.1 Classify these four items—fruit bought, cups bought, table fee, and money received from cups sold—as a production input, business expense, sales revenue, or all categories that apply. Explain why the fruit and table fee fit their categories. **[6]**

1.2 Calculate revenue from the cups sold. **[6]**

1.3 Calculate sales revenue and the cash remaining after the stated outlays. Explain why that cash balance alone does not establish profit. **[8]**

1.4 Explain two reasons the six unsold cups matter for the next market day. Use case facts to recommend how many cups to make or buy, and address freshness or safety, waste, and why unsold stock is not sales revenue. **[10]**

1.5 Recommend one change for Lebo's next market day and support it with two calculations or facts from the case. **[10]**
